YASHWANTH RAVI

Principal Product Manager, Applied AI · PSPO I Certified · Agentic AI & Enterprise Platforms · Growth & AI Products

Bengaluru, India | yashwanthgangur@gmail.com
linkedin.com/in/yashwanth-ravi · yashwanth-ravi.vercel.app · MS AI/ML, IIT Kanpur · PGDM, IIM Rohtak · B.Tech EEE

PROFESSIONAL SUMMARY

Product leader with ~7 years across agentic AI, enterprise platforms and consumer growth. Currently Principal Product Manager, Applied AI at QAD Redzone, owning product direction for Champion AI — an agentic AI platform where autonomous agents act inside enterprise ERP workflows — including the graduated-autonomy model that governs when an agent may act on live customer data. Previously scaled a consumer vertical to 20M+ monthly users at >80% subscription renewal, and led a 9-product 0→1 enterprise platform across 4 countries with two shipped AI systems. Deep in AI/LLM product management, experimentation, acquisition funnels and unit economics. MS in AI/ML from IIT Kanpur and a certified Professional Scrum Product Owner I. Known for turning ambiguous briefs into shipped, measurable outcomes.

CORE COMPETENCIES

- Agentic AI Product Strategy
- Product Strategy & Roadmap
- Enterprise B2B Discovery
- Funnel & Unit Economics
- AI / LLM Product Management
- Platform & API Productisation
- A/B & Multivariate Testing
- Cross-Functional Leadership
- AI Governance & Autonomy Design
- Build / Buy / Integrate Strategy
- Growth & Customer Acquisition
- Influence Without Authority

PROFESSIONAL EXPERIENCE

Principal Product Manager, Applied AI — QAD Redzone Aug 2026 – Present

Champion AI — agentic AI platform for supply chain · Autonomous persona agents across Procurement, Sourcing & Sales · Distributed engineering, design & implementation teams

- Own product direction for Champion AI — defining what an autonomous agent does inside an enterprise ERP workflow, and where it belongs across procurement, sourcing, sales and trade compliance.
- Set the trust and autonomy model for agents acting on live customer data — a graduated-autonomy framework (preview → validation → supervised → unattended) with every action audited and reversible; now the standard every Champion is built against.
- Shipped the Procurement Champion, the first live purchasing agent — automating ~70% of supplier follow-ups and compressing the response loop from days to minutes, with confirmed data written back to the ERP.
- Shifted the delivery model from services to product with Self-Serve Automations — a template library, custom builder and LLM assistant that let customers configure their own agent workflows, removing engineering from the path to each new flow.
- Launched the Sales Champion (AOG/expedite alerting) and a Trade Compliance agent screening 100% of order lines pre-shipment at ~95% flag recall, with evidence attached to every escalation.
- Own build/buy/integrate judgment across the AI and ERP stack — QAD Enterprise Edition and Adaptive UX, AWS Bedrock, Auth0 SSO and Microsoft Fabric — including migrating a customer off a third-party iPaaS tenant onto QAD's own integration platform.

Senior Product Manager — SimStar (Stargems Group) Jul 2024 – Oct 2026

Diamond & jewelry enterprise · 0→1 digital platform across Hong Kong, India, USA & Dubai · Led 2 PMs + engineering, design, QA, data & vendors

- Owned the 0→1 roadmap for a 9-product enterprise platform, digitizing a manual four-country diamond operation and driving ~40% reduction in manual effort across ~200 users and 8 teams.
- Shipped an AI pricing engine (predictive ML) that removed 100% of manual pricing, reaching ~90%+ accuracy (MAPE ~8–10%) validated in shadow mode, pricing ~8,000+ stones/quarter and cutting turnaround from days to seconds.
- Launched an LLM + RAG WhatsApp assistant (generative AI with human hand-off) that lifted query deflection from ~20% to ~50–60% at ~92% answer correctness, ~95% hand-off recall, NPS >9.
- Built simstar.co (0→1, B2B + customer-facing) with full payments and real-time inventory sync, reaching ~50k+ monthly visitors at ~98% payment success.
- Integrated RapNet & marketing platforms via API, auto-syncing ~50k+ stones and cutting listing time by ~90%; built offer management (~50% faster bids) and an in-house pair-stone matching engine (hours → seconds).
- Delivered an Odoo ERP core (Sales, Inventory, Ops, Accounts, Compliance) at ~99% inventory accuracy, and embedded compliance by design — Kimberley Process, RJC, and Tracr blockchain traceability.

Product Manager, Growth & Acquisition — Magicbricks (Times Internet) Jun 2019 – Jun 2024

India's largest real-estate platform · 0→1 PG/Co-living vertical · Consumer growth, subscriptions & acquisition

- Built and scaled the PG/Co-living vertical 0→1 to 20M+ monthly users and 1.5M+ listings, growing from ~1M to 20M+ across five stages via SEO, paid acquisition, and funnel optimization.
- Ran rigorous A/B & multivariate testing on landing pages and checkout, lifting checkout conversion from ~9% to ~11% (~+22%) — an estimated +$1.25M/year in incremental subscription revenue.
- Launched a tiered subscription model under uncertainty (lean MVP → validated willingness-to-pay → scaled 1→3+ tiers), achieving >80% renewal and durable recurring revenue.
- Owned paid + organic acquisition (Google SEM/PPC + SEO), improving message-match and Quality Score (~6→~8) to cut CAC by ~20% and raise ROAS.
- Implemented a Salesforce One-View CRM (registration → invoice) at 90%+ adoption and NPS >8.5, and unified multi-channel support (Email, Ameyo IVR, WhatsApp), reducing turnaround time by ~35%.

EDUCATION

M.S. in Artificial Intelligence & Machine Learning — Indian Institute of Technology (IIT) Kanpur
CGPA: 8.63 / 10

Post Graduate Diploma in Management (PGDM) — Indian Institute of Management (IIM) Rohtak
B.Tech, Electrical & Electronics Engineering (EEE) — Reva University

CERTIFICATIONS

Professional Scrum Product Owner I (PSPO I) — Scrum.org, Nov 2026 · Credential ID 1361140 · scrum.org/certificates/1361140

Scrum Master — CareerNinja, 2023 | **Lean Six Sigma, White Belt** — AIGPE, 2024 | **Leadership Skills** — IIM Ahmedabad via Coursera, 2026

SKILLS & TOOLS

AI & Agentic Systems: Agentic AI & multi-agent systems, LLMs, RAG, prompt design, tool/function calling, AI guardrails & human-in-the-loop, autonomy & governance design, model evaluation (MAPE, precision/recall, golden test sets), classical ML (regression), AI product management

Product & Growth: Roadmapping, RICE/ICE prioritization, A/B & multivariate testing, experimentation programs, MVP development, platform & API productisation, CRO, funnel analytics, unit economics (CAC, LTV, CVR, ROAS, payback)

Platforms & Delivery: QAD ERP (Enterprise Edition & Adaptive UX), AWS Bedrock, Auth0 / SSO, Microsoft Fabric, iPaaS & integration platforms, Odoo ERP, Salesforce CRM, Jira, Confluence, Postman, Scrum/Agile & Kanban, Figma, API/FTP integrations

Analytics & Data: Mixpanel, Metabase, SQL / PostgreSQL, GCP, dashboards, cohort & funnel analysis, segmentation

Domain & Compliance: Supply chain & manufacturing ERP, trade compliance, marketplaces, subscriptions, Kimberley Process, RJC, Tracr blockchain

SELECTED IMPACT HIGHLIGHTS

- Set the agent trust & autonomy standard every Champion AI agent is built against · first live autonomous purchasing agent shipped
- 20M+ monthly users scaled on a 0→1 consumer vertical · >80% subscription renewal
- ~40% manual-effort reduction across a 9-product enterprise platform in 4 countries
- ~90%+ AI pricing accuracy · ~50–60% assistant deflection at NPS >9
- ~+22% checkout conversion lift · ~20% CAC reduction via acquisition optimization

Select metrics are representative estimates pending final verification.
